Subject: RE: Invora

Hi Dan. Sorry to nag, but was hoping to get any feedback by this Wednesday evening on current status/timeline for the Premix below (submission ID RD 1833; latest PRIA is 12/31) and related MUP (submission ID RD 1834; same PRIA). Any info you can provide would be helpful to know for an internal planning meeting scheduled for early this Thursday morning, in addition to informing prioritization proposal below.

Thanks Dan. We have not submitted any withdraw requests yet, as we were waiting to hear EPA's feedback on the whether it could meet what would be the remaining priorities—the 12/31/19 PRIAs for Roundup Xtend 2 Premix and the related manufacturing use product. That feedback will help our Business determine the cost/benefit of proceeding with any withdrawals or re-negotiations.

Yes, thanks Tom. We've got and understand your priorities, so that should help in arranging our workload to best meet the needs. Also, thanks very much for the information regarding the ones that would not be needed, as that would save valuable time that may now be used for those products that are most important. Regarding those withdrawn products, do you know if a letter was ever submitted to officially withdraw them?

Thanks again for this information. We are trying to consolidate our efforts into those areas where it is most impactful, and this helps a lot.

Yes, thank you Tom! My apologies for not reading this carefully before responding. This is very helpful and I will relay this to the folks working the priority list.

Thanks again,
Dan

Dan, there are 3 actions in the table below we are proposing to withdraw that would come off the list. Is that what you meant?

Thanks Tom, I'll pass this on. There was another question about this, were there any applications that you are no longer needing and that could be removed from the list?

Hi Dan. Circling back to your question below on prioritizing Bayer's pending dicamba HT applications. We identified 7 pending dicamba HT applications (please let us know if we missed any). We propose that OPP prioritize 2 of those 7 pending applications per the table below. Happy to discuss next steps or to provide any additional info.

Application	Identifier	Proposed Status
-------------	------------	-----------------

Roundup Xtend 2 Premix, M1833 Herbicide (Ethanolamine Salt)	Submission ID: RD 1833	Prioritize. Latest PRIA date is 12/31/2019; submitted on 6/29/2017
M1834 Dicamba MUP (Ethanolamine Salt)	Submission ID: RD 1834	Prioritize. Latest PRIA date is 12/31/2019; submitted on 6/29/2017
Roundup Xtend 1 Premix, M1769 Herbicide, Uses on HT Soy and HT Cotton	Pending over the top use of EPA Reg. 524-616 on HT Soy and HT Cotton	withdraw
Warrant Dicamba Premix, AD2611 Herbicide	Submission No. RD 1827	withdraw
M1691, uses on HT Soy and HT Cotton	Pending over the top use of EPA Reg. 524-582 on HT Soy and HT Cotton.	withdraw
XtendiMax 2, M1832 Herbicide (Ethanolamine Salt)	Submission No. RD 1832	Renegotiate PRIA, which expires on 12/31/2019
XtendiMax 1, M1768 Herbicide, Use on HT Corn	Submission No. RD 1784; pending over the top use of 524-617 Herbicide on HT Corn.	Renegotiate PRIA, which expires on 12/31/2019

Thanks again for your help with this, Tom. When I sent this, I forgot to also ask you about the status of the dicamba premix applications. We are trying to organize our workload and strategize an approach on the various premixes, and remembered that Bayer had indicated that there were some applications that they were willing to withdraw. Because these applications take more resources than usual to complete and because we don't want to spend those resources on applications that aren't actually needed, did you still intend to withdraw any of those? We'd rather spend the time on those that are still important to the applicants.

Let me know what you think, and we'll organize accordingly.

Thanks very much,
Dan

Dan,

Karen Shearer will send you a proposed waiver tomorrow as soon as possible. Hopefully before the afternoon. Please let me know if there are any wrinkles I can assist with. All is well here, hope the same with you and your team.

Tom

Hi Tom. I hope all is well. I don't know if you are planning to attend the workshop on Thursday with the ranchers from Texas to discuss Invora, but it has occurred to us here at EPA that, if we are indeed going to participate, we need to have Bayer waive the pre-registration confidentiality for that application. I don't know of any template that exists for that, so I would leave it up to Bayer, but based on discussions today, it appears that it will be difficult for us to participate without it. Can you or someone authorized to waive the confidentiality email me a letter to such end? Of course, no waiver is needed for CBI such as the CSF components, just the pre-registration confidentiality that protects against sharing information about the application to competitors. If you can help with this, we need something before the workshop, preferably today or tomorrow. If this is not something that you can help with, can you point me in the correct direction?

Thanks for your help,
Dan Kenny
